PROFESSIONAL SUMMARY

I'm a multidisciplinary designer and planner with a background in architecture, urban planning. Now transitioning into **front-end web development**, I'm expanding my skill set into the web world. I've learned and still learning **HTML, CSS, JavaScript**. And, I have used my knowledge to create my first project to present my portfolio. It was during my master's degree at Politecnico di Torino that my path began to realign with my early interests. Thanks to my tutor and life mentor, Professor Andrea Pollio, I was introduced to the deeper connections between technology and urbanism. Now, I'm committed to fully embracing the world of technology, aligning my career with my lifelong passion.
